1,4SHIP®

1,4SHIP® is a ready-to-use aerosol dormancy enhancer that treats fresh potatoes in transit. Dispense 1,4SHIP® directly into the shipping vehicle to delay peeps, sprouts and maintain tuber firmness. Whether you ship by truck, rail car or ocean vessel container, 1,4SHIP® will help your potatoes stay "field fresh" upon delivery to your customers.

Benefits

- **Delays Peeps and Controls Sprouts**, whether potatoes have been previously treated or not.
- **Maintains Firmness and Crispness** of potatoes during shipping, reducing load rejections or downgrades.
- **Restores Dormancy** and helps potatoes retain moisture
- **Extends Shelf Life** for higher customer satisfaction.

1,4SHIP® *DELIVERS*

How Does 1,4SHIP® Work?

1,4SHIP® effectively restores natural dormancy of potatoes, which slows the conversion of starches into sugars and helps maintain moisture levels. This dormant state also prevents potatoes from peeping.
